

Cesar Sanchez

Web Developer

cesanchezesc@gmail.com

Mexico City, Mexico

5510817016

Profile

Web Developer with analytical skills developed by a solid background in clinical psychology. Recently finished successfully a Full-Stack Web Development Bootcamp. Acquired and developed skills in HTML, CSS, JavaScript, MongoDB/Mongoose, Node/Express.js, and React/GraphQL. I have always been passionate about problem solving and goal-oriented. In Web Development, this translates to hard work, unrelenting search for solutions and creative thinking to surpass barriers and blocks. I am skillful on setting up the Front-end while most of the time I end up working on the Back-end and the connection between both due to feeling more comfortable and confident than my peers. This was the case in a single-page MERN App project in which I have recently participated. My objective is to create responsive, useful and friendly web applications as I continue learning how to do it more efficiently.

Education

Full Stack Web Developer at Tecnológico de Monterrey

2021-2022

HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Git, and others.

Portfolio building based on real-life applications.
